PERSONAL PROJECTS

● IT Service Site (Full Stack)

April, 2021

Live site link - <https://aj-it-farm.web.app>

This is a digital consultancy website. You can get Digital Marketing, Website Development and SEO support for your startup or business.

Used REACT.js and Bootstrap in frontend and Node.js, MongoDB in backend. For authentication and deployment I used Firebase along with Heroku. Payment with paypal was implemented by Stripe API.

● Book Club (Full Stack)

April, 2021

Live site link - <https://ajs-book-club.web.app/>

This is a book buying website. You can order books here.

For frontend development, I used React.js and Material.ui and for backend development, I used Node.js, Express.js. CRUD operation was done by MongoDB. Firebase authentication implemented along with deployment. React Router and React Hook Form libraries are used in this project.

● Transport Service (React)

April, 2021

Live site link - <https://aj-riders.web.app/>

A simple React website where you can have transport service. You can find Bus, Car, Bike or Train service. Also you can give your pickup and drop location.

Used REACT.js in frontend and used fakedata in JavaScript.
